

Holiday Lookbook

Transforming the Dental Industry with Simplified Digital Solutions

It's finally here!
The 2022 Carestream Dental
Holiday Lookbook.

Carestream Dental, a global leader in dental industry innovations, specializes in digital solutions that transform your practice. This year, we're offering special deals and promotions on some of our most popular product lines—from the CS 9600 CBCT system to our intraoral bundles, including the RVG 6200 sensor.

Let's take a closer look at this cutting-edge technology and how you can start elevating your practice.

Extraoral Products

CS 9600

Redefine first-time-right imaging with the CS 9600—a four-time Cellerant Best of Class Technology Award-winner with intelligence-driven precision. This 5-in-1 CBCT system offers several key benefits, including:

- ▶ **AI-powered interactive positioning** that detects and reduces positioning mistakes to deliver consistent results every time
- ▶ **CS MAR software** that drastically reduces metal artifacts in final scans and lets you dynamically compare images
- ▶ **The Prosthetic-Driven Implant Planning (PDIP) module** that enables easy implant planning in fewer appointments while delivering predictable, accurate results. And now, PDIP accepts any open STL/PLY file format for more flexible implant planning

Intraoral Products

RVG 6200 Sensor

Simplify and streamline your workflow with the RVG 6200—a user-defined intraoral sensor designed to work for you, not the other way around. This ergonomic, high-resolution image processing tool offers an easy, comfortable positioning experience for both patient and practitioner; and the durable material withstands shocks, bites and immersions.

This year, we're proud to celebrate the 40th anniversary of our RVG technology, which we've been constantly innovating since its invention. Take advantage of [our celebratory promotional deals](#) to start imaging with ease.

CS 2400P Portable Generator

Experience the convenience and consistency of the CS 2400P generator. With this sleek and powerful handheld X-ray technology, you get:

- ▶ High-quality, accurate images at your fingertips
- ▶ Improved diagnostics with better consistency
- ▶ Flexibility that enhances the patient and practitioner experience

Plus, there's no more worrying about replacing batteries—the portable generator can fully charge the device in just 90 seconds.

To get your hands on this innovative technology, check out [our latest deals](#).

Intraoral Products

CS 1500 Imaging

Educate patients and enhance diagnoses with the true-to-life visuals of the CS 1500.

Designed with ease of use and enhanced mobility in mind, this state-of-the-art imaging tool comes with autofocus and LED lighting features that intuitively capture highly detailed intraoral images—no manual adjustments required.

[Learn here](#) how you can start taking better diagnostic images today.

Dental Practice Management Systems

Sensei Cloud

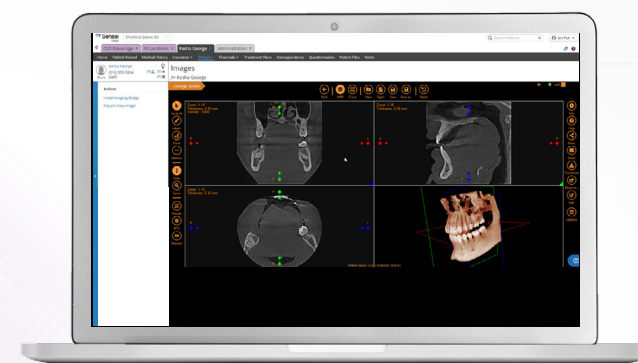

Sensei Cloud is practice management made easy. By combining clinical excellence with business brilliance, this all-in-one solution provides everything you need to optimize all your practice workflows, from the back office to the front.

With Sensei Cloud, you get:

- ▶ One platform with incredible versatility for multiple practice locations and specialties
- ▶ Seamless integrations with other systems to streamline administrative tasks
- ▶ Unlimited secure HIPAA-compliant cloud storage for all your practice data needs

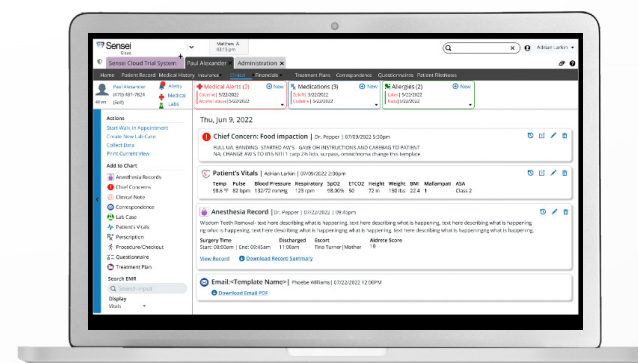

Sensei Imaging

With Sensei's cloud-based imaging platform, you can store and review advanced 2D and 3D images that enhance diagnostic capabilities. View these images anytime and anywhere, with state-of-the-art firewalls and protections to ensure your data remains secure. Plus, easily share with referrals in your network.

Sensei Oral Surgery

Built on the user-friendly Sensei Cloud platform, Sensei Oral Surgery centralizes the functions OMS professionals need most to provide easier access to vital data. When it comes to the business side of oral healthcare, Sensei Oral Surgery provides actionable reporting that shows how a practice is performing, so owners and office managers can track progress and make smart business decisions.
