

# Sensei Imaging

For the digitally forward dentist, Sensei Imaging is the connection between your patient images and the rest of your clinical data in the cloud, so you can retrieve, review and diagnose from within Sensei Cloud, without the need to change your existing imaging hardware.

Sensei provides predictability of costs and the storage of both 2D and 3D images, allowing Oral Health Professionals (OHP) the freedom to increase imaging services provided to patients and to streamline workflows for increased efficiency. Enjoy diagnostic, browser-based imaging tools so you can see more and do more for patients!

## Life Just Got...

### More Convenient

Enjoy fully diagnostic browser-based imaging, including 3D, and seamless integration to Sensei Cloud, so patient images are accessible anytime and anywhere they need to be viewed.

### More Secure

Rely on tight security around the Sensei Cloud to ensure patient data and images are always safe.

### A Lot Easier

Easily configured as an add-on to Sensei Cloud so users can upload, retrieve and manipulate 2D or 3D images captured by any dental imaging equipment all in one place.

### Smarter

In-product robust diagnostic tools, such as 3D enhanced digital imaging and clinical filters and image enhancement, provide your practice with the ability to manipulate images directly in the Cloud and improve user experience and workflow.

### More Cost Effective

Get a predictable monthly budget for improved peace of mind, as well as increase patient case acceptance rates.
